PROFILE

Entry-level data analyst with over two years of experience in automation testing and exposure to database management, data visualisation, and supervised learning models. Proficient in Python, MySQL, Tableau, and Power BI, with strong communication and teamwork skills. Proven ability to deliver data-driven insights and support informed decision-making

Learner | Time Valued | Diligent

TECHNICAL SKILLS

- **Programming Languages:** HTML, CSS, Python, MySQL
- **Data Visualization:** Tableau, Power BI, Jupyter Notebook
- **Database:** MySQL
- **Tools:** AppDynamics
- **MS Office:** Excel, Word, PowerPoint
- **OS:** Windows, Linux

ACHIVEMENTS/APPRECIATION

- **Team Squad Award** - QualityKiosk
- **All INDIA Essay Writing Event:** Certificate of Merit.
- **Runner Up** – Avishkaar 2018(Institute Level Project Exhibition under IETE Oscillation).

CERTIFICATES

- **MICROSOFT TECHNOLOGY ASSOCIATE:** Introduction to Programming using Python.
- **SPOKEN TUTORIAL:** HTML, CSS, Java, Python, PHP, MySQL
- **IELTS** Qualified

LANGUAGES

- English
- Marathi
- Hindi

HOBBIES/INTEREST

- Cooking
- Watching SciFi Movies/Webseries
- Riddles

EDUCATION

MSc in Information System: UNIVERSITY OF PORTSMOUTH, UK

2024 - present

B.E. in Computer Engineering: MUMBAI UNIVERSITY, INDIA

2018 – 2021 with 8.00 CGPA

Diploma in Information Technology: MUMBAI UNIVERSITY, INDIA

2015 - 2018 with 76.02%

SSC: GENERAL EDUCATION ACADEMY, INDIA

2014 - 2015 with 77.20%

PROFESSIONAL EXPERIENCE

Digital Quality Engineer:

QUALITY KIOSK PVT. LTD.

Oct 2021 – Dec 2023

- Utilized **SQL** to analyse and debug production data, enabling effective problem resolution for real-user issues.
- Monitored application performance metrics (performance and availability of web & mobile applications) using **AppDynamics**, providing actionable insights to stakeholders. (worked with production data).
- Automated testing processes using **Python** and Selenium to improve efficiency.
- Collaborated & **interacted** with clients to understand business requirements by reporting & delivering tailored solutions.
- **Addressed issues** on the backend through AppDynamics which helped to solve the bugs/issues observed for real users.
- **Maintained** detailed project documentation and guides to ensure knowledge transfer and consistency.
- **In charge of rebooting** the server processes and having sanity check for same.

PROJECTS

DETECTION OF PHISHING WEBSITES BASED ON URLS

[B.E.(2018 - 2021)]

- The phisher's clone sites look similar to legitimate ones in terms of interface URL address and other features
- Identification of the most important risk factors based on the classification rules.
- Features such as length of URL number of slashes, colon, length of URL, and special characters were included while building the model & data (training and testing) was divided as 70% & 30% respectively.
- **Technologies:** Python, Supervised Learning (Random Forest Algorithm).
- **Primary Goals:** Identify the genuine sites by applying conditions/attributes on the URL.
- **Result:** Accuracy of 86% was achieved. Also, the results were accurate for real data.

COMPUTER USAGE MONITORING SYSTEM

[DIPLOMA (2017 – 2018)]

- Smart Lab refers to a software or operating system feature that allows a personal computer's desktop environment to be run remotely on one system while being displayed on a separate client device.
- Modules including Chat, Control (shutdown, log off, restart), device detection, file transfer, and screenshot capture have prompted the functionality of the software.
- **Technologies:** C#, SQL
- **Primary Goals:** Identify the remote devices where processes are running unnecessarily and handle them remotely without physically moving to a specific place.
- **Result:** All test cases pass during performing/testing.
